

Mrs Susan Todd

I am married with one child and I enjoy walking, cycling, yoga and reading, especially with my son. I love visiting the coast and I am passionate about the outdoors and outdoor education.

Education

Bcs (Hons) Biology

PGCE Primary and Early Years with Science specialism

I gained my Biology qualification at Southampton University and developed a love of teaching whilst working in outdoor education for 5 years with The Wildlife Trusts. I gained my teaching degree 6 years ago and have been fortunate to work as a Primary Teacher at Stanton St Quintin Primary School since qualifying from Bath Spa University.

Why I became a teacher

I loved encouraging children and adults to care about the environment and teaching them about our natural habitats, but I wanted to work with children for longer than an afternoon. I wanted to be there to support and nurture them not just as learners but as individuals, so I embarked on my teaching career.

My role at Stanton

I am a class teacher in Amazon Class, teaching Years 1, 2 and 3 two days a week. I am also the Science Subject Leader as well as the PSHE Subject Leader.

I am ridiculously passionate about the power of learning outside of the classroom and science experiments!

Why I love working at Stanton

I wanted to work somewhere that felt like a home from home, where I knew every child's name and could work with a supportive team. That is what Stanton St Quintin Primary School is like. Around every corner there is a friendly face ready to help or be helped. We are a team; pupils, staff and parents all supporting one another. That makes for a superb place to work.
